

Escapade Summer School

An original combination of courses and transversal activities

17 - 24 August
2021

A scientific course on : « Host Plant Resistance Breeding »

This summer school is designed to show that plant breeding and plant protection go side by side and that an integrated approach in plant sciences is needed to improve plant health.

It gives the possibility to exchange ideas on Applied Plant Sciences with people from different learning backgrounds and to experience the international and intercultural atmosphere associated with exchange programmes.

17- 21 August + home assignment

Fun learning through innovative pedagogies, and a friendly group competition on Host plant resistance projects.

 **3.0 ECTS**

A job fair and extension event : « Job perspectives in Applied Plant Sciences »

This job fair bring together students in Applied Plant Sciences, academics and company representatives to discuss job opportunities and highlight students professional skills.

It also corresponds to an extension event, where ESCADAe results and perspectives will be discussed and shared with additional european and non european organisations to extend our network and activities.

23-24 August

Including speed dating with company representatives, round tables, training in transferrable skills, career workshop, information on PhDs.
